

Freedom Group is committed to delivering services and projects to our clients in a responsible manner. As such, we make every effort to reduce our environmental impacts, continually improve our environmental performance and support clients in reaching their environmental goals.

To facilitate this, our environmental management system is certified to the international standard BS EN ISO 14001:2015. It is documented, implemented and regularly reviewed.

In order to protect the environment we will:

- Prevent pollution of land, air and water, by providing appropriate levels of environmental training and supervision for company employees, subcontractors and all persons working under our control.
- Protect biodiversity and ecosystems through raising awareness, effective control measures and procurement of materials from sustainable sources.
- Comply with, and where possible exceed, all environmental legislation and other requirements to which we subscribe, relevant to our activities.
- Continually improve environmental performance. This is achieved by top management setting clear environmental objectives and monitoring performance against the targets set.
- Minimise the volume of waste generated through our activities, by promoting re-use and recycling.
- Promote energy efficiency in the contracts we deliver and manage energy wisely throughout our own property portfolio.
- Promote improved fuel efficiency in our transport fleet; to reduce our impact on climate change and air quality.
- Work with suppliers, customers and contractors to promote sustainability and environmental awareness.
- Work in a socially responsible manner, recognising our responsibilities to any third parties who may be affected by our works.
- Integrate environmental innovation and efficiency in project design, construction and the services we provide; to foster resource efficiency and climate change mitigation measures.

This policy applies to all Freedom Group operations and will be communicated to all those working for or on behalf of the Company.

David Hartley, Chief Operating Officer
