**Freedom**  
an NG Bailey Group company

# **Environmental Land Management**

PASSION | INTEGRITY | EXCELLENCE

**Freedom provides environmental land management and invasive species solutions to organisations with large and varied estates. Our experienced teams take the worry out of land management, helping customers meet their environmental obligations - leaving them free to focus on delivering their core business.**

Our focus is to ensure the land under your control is managed efficiently - our team will act as an extension of your business. We pride ourselves on adding value by providing you with enhanced knowledge.

We employ experienced practical Chartered Surveyors and Land Officers with utility company backgrounds and excellent communication skills.

With some 30,000 hectares under our active management, we provide a range of bespoke services ranging from tree risk management; ecology and biodiversity management and consultancy; habitat management including creation and site clearance; land management advice; environmental compliance services; health and safety compliance services and project management and supervision services.

We also provide PCA approved management of Japanese Knotweed and other injurious weeds. Our bespoke treatment and removal management plans are fully compliant with industry standards and are recognised by all banks, building societies and lenders to allow lending against a property.

Our fully qualified surveyors use the most effective methods and solutions, led by the most advanced and up-to-date research.
